TECHNICAL DATA SHEET

CANNASOL CB SALICYLATE (CB-S) (POLYCANNABOATE DISALICYLATE)

<u>Overview</u>

Patent-pending CannaSol CB Salicylate is a multifunctional emollient ester. It is a safe, hemp-derived ingredient suitable for both oil and water-based systems, delivering improved absorption and bioavailability.

Recommended applications include topical products intended for acne treatment, pain, inflammation, skin exfoliation, skin renewal/regeneration, skin healing, and anti-aging. Other uses include UVB boosting, hair care, lip care, and more.

Technical Specifications

Appearance at 25°C	Viscous Liquid
Color (Gardner)	15 Max
Clarity	Hazy at 25°C
Hydroxyl Value	75 - <u>100</u>
Acid Value	10 Max
Saponification Value	65 Max
SPF Static (neat)	28
Refractive Index	1.52 - 1.62

Formulation Guidelines

- CannaSol CB Salicylate may be utilized in both oil and water-based formulations.
- For product formulations with an oil phase to be emulsified into a water phase, the incorporation of CannaSol CB-S works best if added to the water phase while mixing, prior to the mixing of both phases.
- As is the case with all product formulations, the exact process is dependent on the type of product, its composition, and quantity of ingredients, to name a few considerations.

Storage & Handling

Store tightly closed container in a cool and dry area.

Available Packaging

- 3 Ounce Sample
- 1 Liter
- 1 Gallon

- 5 Gallons
- 55 Gallon Drum
- 275 Gallon Tote
